COMMERCIAL PRESENTATION

1. PRESENTATION

ALLEAD ENERGY ANGOLA, LDA is a 100% Angolan company, wholly owned by Angolan shareholders, founded in 2008, growing and based on a philosophy of proximity to customers and suppliers, developing solutions and investing in technical and technological innovation available within its vast area. of action, namely in the Oil, Food and Transformation Industry.

The Angolan company has an experienced and qualified team, investing in the continuous training of its employees and thus evolving in a sustained and balanced way.

Being today a reference company, in 2022, ALLEAD ENERGY ANGOLA, LDA, invested in the area of Metalworking, Hydraulic Systems, Industrial Maintenance, Supply and Repair and Maintenance of Heat Exchangers, Centrifuges and Separators, as well as in the supply of Lubricants for brands MOBIL, CASTROL and LUKOIL. The knowledge acquired by its new employees, with decades of experience, allows them to master the entire process from the study of the proposal, through construction, or production and installation, after-sales and maintenance.

Our mission is to offer our customers services that exceed industry standards and always within the agreed deadlines, anticipating and mitigating operational risks, but above all, without compromising on team safety. This objective is only possible with the Management and Technical Staff being very close to the work fronts – this is the dimension that differentiates and elevates us.

2. AREA OF ACTIVITY

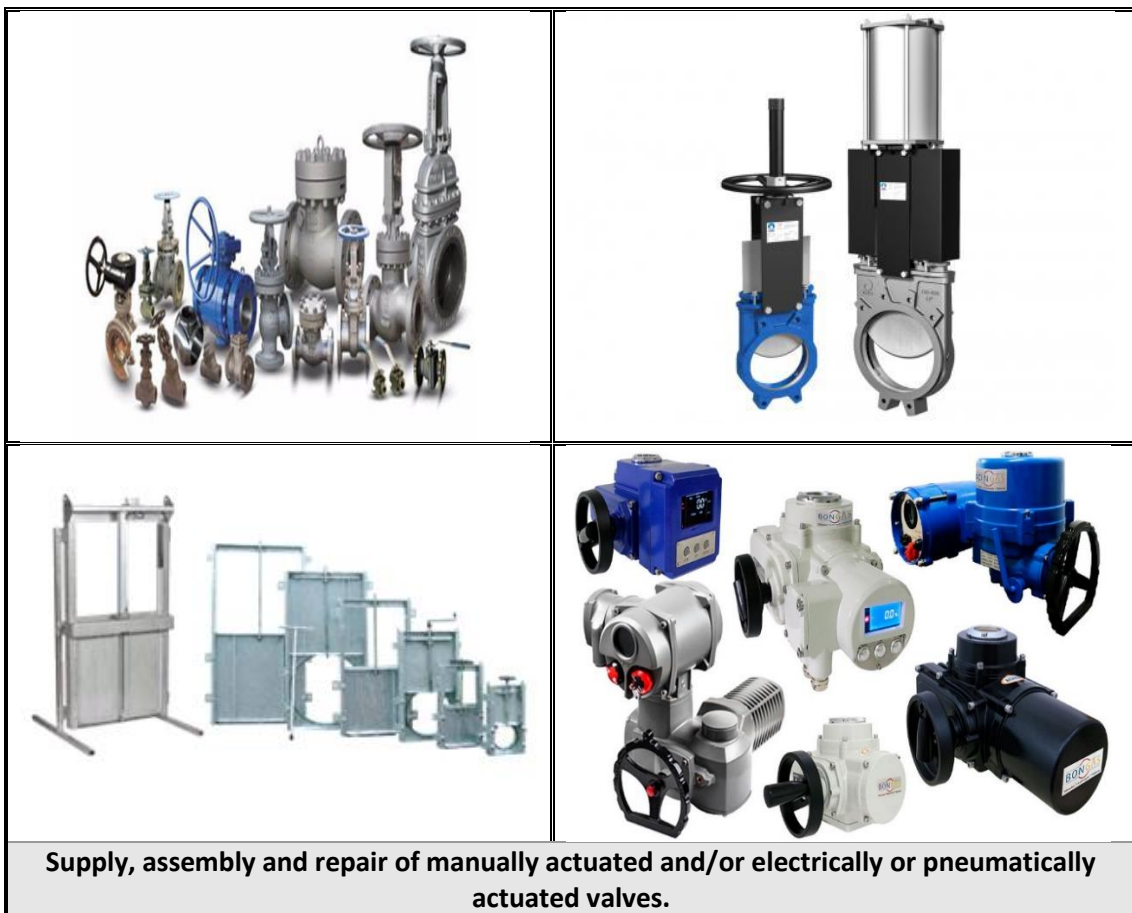

In view of the constant evolution of the market, we seek to develop skills combined with the best techniques and technologies available within this area of expertise:

- Manufacture and assembly of metallic structures;
- Supply, assembly and repair of actuation valves and/or electric or pneumatic actuation
- Supply, Maintenance and Repair of Heat Exchangers, Centrifuges and Separators (in our Workshop in Viana or at the end user's location)
- Execution of welding work in carbon steel or stainless steel
- Construction of pipes in carbon steel or stainless steel
- Supply and assembly of hydraulic, fire and compressed air networks
- Manufacture and assembly of piping and accessories;
- Light sawmill;
- Execution of cutting work (Guillotine, Oxyfuel, Laser, waterjet and Plasma);
- Execution of bending and calendering work;
- Execution and machining of parts;
- Manufacture of guards;
- Grating floors;
- Manufacture of metal lids;
- Skid manufacturing;
- Requalification of silos/tanks.

A. ACTIVITY WITH CABGOC

In 2011, to assist its customers with workable solutions, Allead Energy Angola Lda was invited by CABGOC to assist identify valves and other equipment offshore at FPSO KUITO, as all the necessary information on the equipment was no longer. This to expedite spares identification and supply when needed.

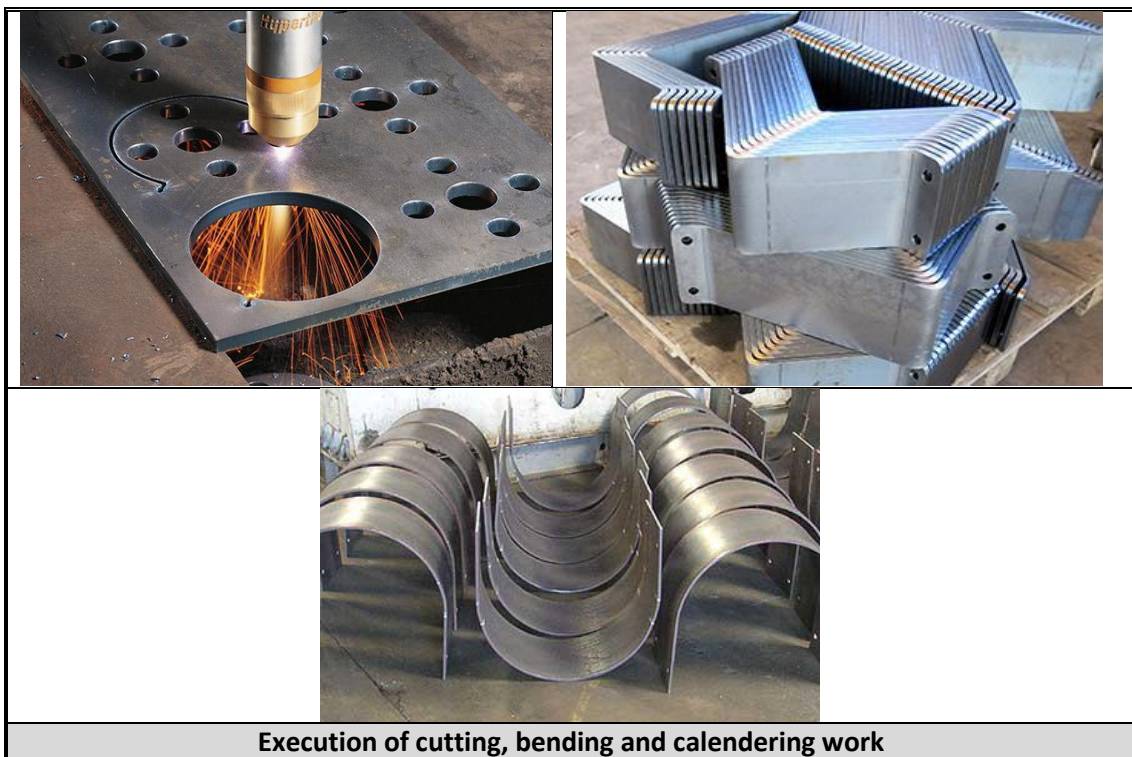

Relations got closer at the end of 2022, with Allead Energy Angola receiving more orders and successfully delivering to Base Malongo.

Execution of lathe work and mechanical milling

Supply of Plate Type Heat Exchangers (PHE) and spare parts.

PHE Maintenance and Repair

3. SHST

ALLEAD ENERGY ANGOLA, LDA, in its development policy, undertakes to identify and minimize risks, adopting equipment and operating techniques compatible with compliance with applicable SHST legislation and standards.

Thus, based on the update of the survey of the most significant risks, the objectives and goals of SHST are established, the fulfillment of which is ensured through the implementation of the management plan for safety, hygiene and health at work.

4. QUALITY

ALLEAD ENERGY ANGOLA, LDA is in the process of implementing the ISO 9001 Quality Management System. The implementation of the QMS was designed and aimed at improving and sustaining the general performance of our businesses, products and services.

We recognize and support the advantages of quality management principles in our activity. The aim of the Quality Management principles is to create a baseline and constantly improve our performance.

5. SOCIAL RESPONSIBILITY

Social Responsibility goes hand in hand with the concept of sustainable development.

A responsible attitude towards the environment and society not only ensures that resources are not scarce, but also extends the concept to a broader scale. In this sense, ALLEAD ENERGY ANGOLA, LDA considers itself an integral part of the local community and actively participates in local and regional aspirations and activities.
